

Summary:

This plan is primarily aimed at ensuring all health safety conditions for customers and employees, in strict compliance with the current legal norms and standards related to certifications assigned to BBDouro in response to the pandemic caused by “COVID-19”.

It also contains a set of actions and procedures that, although not being explicitly enshrined in any of the aforementioned rules, are considered an added safety factor and thus will be adopted by BBDouro during this period.

Depending on the evolution of the situation, both from a scientific and legal point of view, this plan will naturally be subject to updates according to the evolution of the situation. These updates will always be communicated in a timely manner.

This plan was developed in strict collaboration with Lusíadas Saúde Group.

This plan was developed based on standards and knowledge as of May 11th, 2020.

Actions and procedures:

1. Arriving to the location, children and their parents must wait outdoors for the Monitor or BBDouro’s responsible in the area indicated as “Waiting Area” (attached map), respecting the safety distance.
2. Access to the office is limited to BBDouro staff, thus administrative matters should be dealt with BBDouro’s employee in an area outside the office.
3. Locker rooms are closed, and so children should arrive at BBDouro already equipped for the lesson.
4. Belongings will be placed by Monitors in a space designated for this purpose in the warehouse area.
5. Arriving at the warehouse area, children must disinfect their hands using the dispensers installed there for that purpose (1).
6. Entry into the warehouse is limited to BBDouro’s collaborators only. All the material required to equip the boat will be provided by the Monitors.
7. There will be a safety distance between boats during assembling and rigging.
8. Each monitor shall be accompanied by only one child on his motor boat.

9. Use of facial mask is optional.
10. Life jackets will be washed, disinfected and isolated after each use, respecting a minimum period of 48 hours between uses (2).
11. Boarding / landing will be carried out gradually in order to avoid a higher than desirable density of people in that area.
12. After arriving ashore, used life jackets must be given to the Monitors, so that they are placed in the designated place (4) and then sent to the disinfection area.
13. In case a change of clothes is necessary, it must be done outdoors.
14. After each use, boats will be washed with soap and water and sensitive areas will be disinfected.
15. After the lesson, children will have to disinfect their hands once again.
16. Students must wait for their parents accompanied by their Monitor and/or BBDouro's responsible in the same "Waiting Area" referred to in point 1.
