

Summary:

This plan is primarily aimed at ensuring all health safety conditions for customers and employees in strict compliance with the current legal norms and standards related to certifications assigned to BBDouro in response to the pandemic caused by “COVID-19”.

It also contains a set of actions and procedures that, not being explicitly enshrined in any of the aforementioned rules, will be adopted by BBDouro as it considers it to be an added safety factor.

In view of the permanent evolution of the situation, both from a scientific and legal point of view, this plan will naturally be subject to updates that follow the evolution of the situation, which updates will always be communicated in a timely manner.

For the elaboration of this plan, we had the collaboration of the Lusíadas Saúde Group.

This plan was developed based on standards and knowledge as of May 11th, 2020 and updated September the 2nd 2020.

Actions and procedures:

1. Arriving to the location, children and their parents must wait outdoors for the presence of the Monitor or BBDouro’s responsible in the area indicated as “Waiting Area” (attached map), respecting the safety distance.
2. Access to the office is limited to 1 person besides BBDouro collaborators, so administrative matters to be dealt with BBDouro’s responsible can occur through digital means.
3. Locker rooms are limited to 1 person, but BBDouro advises the pupils to come already equipped for the lesson. The cleaning of the locker rooms are responsibility of Douro Marina.
4. Belongings will be placed by the Monitors in a space for this purpose in the warehouse area.
5. Arriving at the warehouse area, children must disinfect their hands using the dispensers installed there for that purpose (1).
6. Entry into the warehouse is limited to BBDouro’s collaborators only. All the material necessary for boat equipping will be provided by the Monitors.
7. There will be a safety distance between boats during assembling and rigging.

8. Each monitor may be responsible up to 12 children.
9. Facial mask is optional.
10. Life jackets will be washed, disinfected and isolated after each use, respecting a minimum period of 48 hours between uses (2).
11. Boarding / landing will be carried out gradually in order to avoid a higher density than desirable in the embarkation / disembarkation area.
12. After arriving ashore, the used life jackets must be given to the respective Monitors for placement in a specially designated place (4) and later sent to the disinfection area.
13. If a change of clothes is necessary, it must be done outdoors.
14. After each use, boats will be washed with and sensitive areas will be disinfected.
15. After the lesson, the children will have to disinfect their hands again.
16. Students accompanied by the respective Monitors and/or BBDouro's responsible must wait for the presence of their parents in the same "Waiting Area" referred to in point 1.
